

Smith's Clear Penetrating Epoxy Sealer (CPES)

Smith's Clear Penetrating Epoxy Sealer [CPES] is a two part epoxy that is used for sealing and stabilizing wood. It forms a semi-permeable membrane that slows absorption, yet allows evaporation if water absorption happens. It is especially good for use as a sealer of a new boat bottom [apply two coats] before it is bedded in 3M 5200.

Smith's Tropical Hardwood Epoxy

Smith's Tropical Hardwood Epoxy glues any wood, hard or soft. Originally developed for marine applications, it will hold up to the constant beating and vibration common in everyday boat use. Due to a special wetting additive, oily woods, such as teak, need no special pretreatment beyond a fresh sand or saw-cut surface. When cured it will have a toughness and hardness comparable to hardwood while still remaining highly flexible, so as to distribute stress over a wider area. Smith's Epoxy Cleanup Solvent will dissolve and clean up excess Tropical Hardwood Epoxy before it is cured. Use only in temperatures above 50 degrees.

Smith's Fill-It Epoxy Filler

Smith's Fill-It Epoxy Filler is a two part non-sag epoxy filler for the restoration of wood. It is easily sanded and cures overnight. Wood should first be prepared by cleaning and removing any loose finish, followed by sealing with Smith's CPES [a few hours drying time is necessary on sanded wood before application of filler]. Smith's Fill-It Epoxy Filler should dry to a full cure overnight with temperatures at 68 degrees and above.

3M 6000 Series Half Facepiece Respirators

3M 6000 Series Half Facepiece Respirators are commonly used for stripping, sanding, painting, sealing, and for mixing and applying two part epoxy systems. Each of our halfpiece assembly includes: one face piece, one pair of 3M 6001 organic vapor cartridges, two pairs of 5P71 Particulate Prefilters, and one pair of 501 Particulate Filter Retainers. We also sell the replacement Organic Vapor [OV] cartridges for this respirator. Classic Boat Connection strongly recommends you use a respirator when working on restoring your boat.

3MRESPL	3M Respirator [large]	\$41
3MRESPC	3M Replacement OV Cartridge [pair]	\$17

Interlux Interprotect 2000E Barrier Coat

Interlux Interprotect 2000E is a two part self priming epoxy for protection against water absorption. It is used on bottoms after sealing them with two coats of Smith's CPES. [Allow the CPES to cure for 24 to 48 hours.] Apply 3 or 4 coats of Interlux Barrier Coat and allow it to cure 48 hours before applying your bottom paint. It helps your bottom planking from absorbing water and thus expanding and contracting.

INTEPOXY	Interlux Interprotect 2000E	\$122

3M 5200

3M 5200 Mahogany polyurethane caulk is extremely strong and retains its strength above and below the waterline. It remains workable 4 hours after application, is tack free in 48 hours, and cures in 5 to 7 days. It stay flexible and allows for structural movement.

It is an extremely permanent caulk and should be used with some caution because it can be very difficult to remove.

3M5200M	Mahogany 3M5200 Caulk [10 oz]	\$25
3M5200MCASE	Mahogany 3M5200 Caulk - Case of 12	\$285
