

Phillipine Mahogany Bungs

Put a dab of yellow carpenter glue in hole and force bung in with pliers. Line up grain. Do about 40 at a time, scrub off excess glue with a brush and warm dish soap and water. After the glue dries, hack off bung with a chisel. Classic Chris Craft boats typically use 3/8" bungs.

Sikaflex 291LOT Caulk

High quality permanent polyurethane white caulk that stretches or compresses up to 25 %. We recommend this caulk for deck and bottom seams no greater than 1/8". Sikaflex 291LOT cures in 5 days and can be painted over.

Deck seams should be caulked after varnishing is complete. First clean varnish out of the seams, then mask off seams with 3M Fine Line Tape. Smooth the wet caulk with a teaspoon to leave a concave surface. Be careful with the removal of the Fine Line Tape in order to avoid a jagged edge on your seams. Generally it is time to strip the tape from the first seam after you have finished caulking your last seam. Do not leave tape on over night.
